The school is under construction for a new wing. The construction will be completed by June 2024. The Fire Hydrant Hose Reel will be installed for the entire school after the completion of school building. We begin the fire safety process in March 2024. Thus according to CBSE norms the fire safety certificate will be produced. We have refilled fire Extinguishers on 10<sup>th</sup> November 2023 with its next refilling period 11<sup>th</sup> November 2024. The Hydrant Hose Reel will be established between March to August 2024. The school has 5,000 liter water tank capacity and the Nagar Palika is at 500 meter distance to obtain fire safety assistance at the time of emergency. Due to construction we are not in position to establish the fire safety certificate. We promise to establish in the above given period of time. We humbly request you to consider this reality. Thank you.

Truly,

Sr. Rita PHJC, Principal Shanti Nilaya High School Dhamnod
